

# News for 2025

To our Valued Customers,

Our top priority is to serve you with efficiency, consistency, competitive pricing, and a well-stocked inventory to meet your needs. As part of our commitment to continuous improvement, we regularly evaluate our service levels, locations, and overall operations.

In 2025, Steve and I are excited to announce several updates. We are adding **two new locations** to better serve you, expanding **three existing locations** to increase capacity for growing demand, and relocating **two locations** closer to stronger customer bases to enhance service levels. These changes reflect our ongoing efforts to optimize operations and better meet your needs. By optimizing our delivery zones and consolidating resources, we aim to **improve delivery efficiency** by streamlining routes for faster, more reliable service. Additionally, we are enhancing **inventory availability** by centralizing and expanding stock to ensure you have access to the parts you need, when you need them.

We're also thrilled to be working on exciting new product lines. Our team is sourcing **hard-to-find parts** and **high-quality** products that offer **exceptional value**.

Thank you for your business and continued partnership. These enhancements, building on over 35 years of experience, are designed to improve your overall experience with us. We look forward to serving you even more effectively in 2025 as we strive to improve every day.

Steve Thorne, CEO & Founder

Sincerely,

Shawn Senior, President

## STABILUS LIFT SUPPORTS

STABILUS gas-charged lift supports make it **easy and safe** to raise and lower heavy hoods, rear hatches and tailgates by hand. As the world's leading manufacturer of lift supports STABILUS **provides exact replacements** for practically any application where a lift support is used.

**NEW  
PRODUCT**

## Now in Stock!

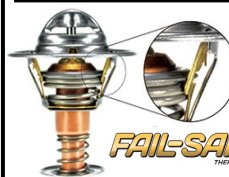

Restore your power lift gate back to original smooth functioning operation. **Stabilus** is the top **OE Supplier** with expertise in **automatic opening, closing, programmable positions**, and **obstacle detection** to prevent injuries or damage.

## MOTO RAD<sup>®</sup>

### Thermostats & Integrated Housings

MotoRad integrated thermostat housings differ from traditional thermostats. They offer an all-in-one, bolt-on solution with the thermostat and housing integrated into one unit. This is a growing segment of thermostats with a large number entering the replacement window.

MotoRad's Fail-Safe Thermostats automatically lock the valve into a wide-open position to allow coolant to circulate freely. This allows a deteriorating cooling system to activate a precision engineered piston.

MotoRad's UltraStat uses a high-grade triple bridge design for strength and stability. Superior response to cooling needs and an enlarged opening to provide increased flow.

Dorman Locking Hubs are manufactured using high quality materials for long lasting durability. Dorman Locking Hubs are thoroughly tested to ensure longevity.

Dorman Valve Covers are all direct replacements to ensure a proper fit every time. The metals are corrosion-resistant to provide tight, lasting seals against oil leaks.

Restore proper engine function with Dorman Throttle Bodies. These electronic assemblies will maintain the correct volume of airflow into your engine.

Dorman Engine Coolers are engineered to help maintain proper engine oil temperature when an original cooler has failed from heat, corrosion or damage.

 **BOSCH O2 Sensors**

*Bosch invented the automotive oxygen sensor and leads the way in sensor technology and innovation. From overall sensor design to the critical ceramic element, Bosch is known worldwide for quality and performance.*

- Premium Bosch oxygen sensors are designed to improve fuel economy while reducing harmful emission.
- Direct Fit includes OE Connector for Easy Installation!
- Performance meets or exceeds OE specifications.
- True Direct-fit OE connectors and harness!

**MYPLACE4PARTS**

If you need to lookup & order parts quickly, you need MYPLACE4PARTS! MyPlace4Parts has been recognized by technicians as the easiest to use and most complete parts ordering e-commerce system available in the automotive aftermarket!

**MacPherson Ride Chassis Parts are the very best in strut assemblies now available for undercar!**

- **Ultra-Guard™ corrosion coating** prevents build up of harmful contaminants.
- Pre-loaded with **high-quality lubricating grease**
- **Improved boot design** and material with all-season performance.
- Coated hardware included for **quick install**
- **Comprehensive** steering, suspension and wide control arm assembly coverage for all popular makes and models.
- **Exceptional** value and easier installation which delivers reliable performance!

**Bushings**

**Ball Joints**

**Idle Arms**

**Control Arms**

 **DENSO O2 Sensors**

Denso O2 Sensors are made with Stainless Steel Housings to resist corrosion and contamination with a rugged, watertight body. Denso's superior design maximizes engine performance while reducing fuel consumption and harmful emissions. With Denso's exclusive design, the Aluminum-Oxide trap layer prevents damage to the platinum electrode. Denso is committed to delivering the right part the first time!
